HAS permanently located himself in Woodville, and is prepared to perform all operations in DENTAL SURGERY, in a manner, at least, not inferior to any in the South Western States.  
His success for the last twelve years, in this and the adjoining counties and parishes, in the Plugging, Extracting and Insertion of Teeth, from one to a full set, both upon pivot, by clasps, and atmospheric pressure, has been such as to preclude the necessity of giving references, as it is generally known that his operations have stood the test of time, and not found wanting.

Those requiring his services, will find it their advantage to visit him at his office, (connected with his residence, on Main st., nearly opposite Mr. Therrell's Hotel, at the light and convenience of chair, and the arrangement of instruments are such as to enable him to perform operations more slowly and with greater facility, than at the residences of the patients. Time and expense will thereby be saved.  
The disease of the teeth and month, even more influence on the digestive and their visceral organs, than persons are generally aware of, and the timely application to a Scientific Dental Surgeon, may often not only save teeth supposed to be beyond cure, but relieve diseases that medicine would not reach, on account of the irritation caused by them.  
Too much attention cannot be paid to the timely care of children shedding their milk teeth, (temporary set) as well as the regulation of the second or permanent ones, which are liable to grow crooked, or be so rounded as to insure early decay, and the suffering and inconvenience of most of the Dental operations now necessary to be performed.
